Galvanised Metal Scaffold Tube 6m Length 245N/mm2 3.2 thickness steel pipe

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: $5-$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Diameter: 48.3mm
- Surface Treatment: Galvanised
- Thickness: 3.2mm
- Application: Scaffolding
- Length: 6m
- Bending Radius: >2.5D
- Yield Strength: 245N/mm2
- Corrosion Resistance: Excellent
- Highlight: **Galvanized Scaffolding Pipe**, **Metal Galvanised Scaffold Tube**

Product Description

Product Description:

Outer diameter(mm)	Thickness(mm)	Length(mm)	Weight(kg/M)
38	4.0	0.3-12	3.35
42.3	2.0	0.3-12	1.99
48.3	3.2	0.3-12	3.56
48.6	2.4	0.3-12	2.73
60.3	3.0	0.3-12	2.88

Galvanized steel pipe is often galvanized to improve its corrosion resistance and longevity. The galvanized layer can effectively protect steel pipes from oxidation and corrosion in the environment, making them more suitable for use in projects outdoors and in humid environments.

4. Advantages:
- Strong and reliable: Galvanized steel pipes provide a solid support structure and are suitable for scaffolding construction to ensure construction safety and stability.
- Durability: Galvanizing treatment increases the durability of steel pipes, extending their service life and reducing maintenance costs.
- Multi-purpose: Suitable for a variety of applications including construction, pipeline, marine and stage construction.

Technical Parameters:

Property	Value
Material	Galvanised Steel
Diameter	48.3mm

Corrosion Resistance	Excellent
Bending Radius	>2.5D
Yield Strength	245N/mm2
Thickness	3.2mm
Elongation	>20%
Surface Treatment	Galvanised
Standard	EN39
Length	6m

Support and Services:

Technical Support and Service for Galvanised Scaffold Tube

We provide comprehensive technical support and service for Galvanised Scaffold Tube. Our experienced technical experts are available to help customers with product selection, installation and troubleshooting. We also offer design and engineering services to customize the product to meet customer needs.

We provide on-site technical support and service to customers who need assistance with installation, maintenance and repair. We also offer online technical support and assistance through our website and telephone. Our staff are available to answer any questions and provide guidance with product selection and installation.

Our team of experienced technicians can also provide remote support and assistance via phone and email. We are always available to answer any questions and provide guidance on product selection, installation, maintenance and troubleshooting.

If you have any questions or require any assistance with Galvanised Scaffold Tube, please do not hesitate to contact us.

Packing and Shipping:

Packaging and Shipping for Galvanised Scaffold Tube

Galvanised scaffold tube is packaged in bundles of 25 or 50 pieces, securely wrapped in plastic and bound with steel straps. For extra protection, the entire bundle is then shrink-wrapped. The bundle is then securely placed on a pallet and shrink-wrapped again. The pallet is then loaded onto a truck and shipped to its destination.
