Advanced Frame System Structuring with High Stability for Powder Coating Solutions

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT04

Product Specification

- Material: Steel
- Safety: High
- Cost-effectiveness: Yes
- Surface Treatment: Powder Coating
- Weight: Lightweight
- Color: Steel, Painted Color
- Load Capacity: High
- Flexibility: High

Product Description

Product Description:

Frame System Scaffolding is a type of walk through scaffold system that is designed for maximum reusability, durability, load capacity, easy dismantling, and safety. It is composed of a series of ladder frames built with robust, strong components that can withstand the test of time. The ladder frames are connected with a secure and reliable walk through scaffolding system that allows for easy maneuvering. With its robust construction and high load capacity, Frame System Scaffolding is perfect for any construction project. It is easy to dismantle and can be reused over and over again without any wear and tear. With its high safety standards, it ensures the safety of workers and the public. Frame System Scaffolding is the perfect choice for any construction projects that requires a reliable, durable, and safe scaffolding system.

Features:

Frame System Scaffolding: A cost-effective scaffolding frame system that is easy to install and provides a highly stable customized surface with a powder coating.
Cost-effectiveness: Yes, the frame system scaffolding is an affordable solution for any construction project.
Easy Installation: Yes, the frame system scaffolding is designed for easy installation.
Surface Treatment: Powder Coating to give a strong and durable finish.
Size: Customized to match your scaffolding needs.
Stability: High, the frame system scaffolding provides a strong and secure base for any construction project.

Technical Parameters:

Attribute	Parameter
Weight	Lightweight
Easy Dismantling	Yes
Durability	High
Easy Installation	Yes
Flexibility	High
Material	Steel
Safety	High
Color	Steel, Painted Color
Size	Customized
Surface Treatment	Powder Coating

Applications:

Frame System Scaffolding
Bythai BT04 Frame System Scaffolding is an ideal choice for all your construction needs. Its high durability, stability, and safety make it stand out from other scaffolding systems. It is made of lightweight steel, painted in attractive colors, and has a high level of resistance. This product is perfect for any construction project or structural system.
The Bythai BT04 Frame System Scaffolding is designed to provide a secure and stable platform for a wide range of construction tasks. Its heavy-duty steel frame ensures a strong foundation that can withstand heavy loads. It also has a unique h-frame design that makes it more stable and secure. The scaffolding is also designed with safety in mind, as it has adjustable guardrails and safety nets that will protect workers from falls.
The Frame System Scaffolding is also easy to assemble and transport. Its lightweight steel design makes it easy to move around the construction site and can be quickly assembled with minimal effort. It is also easy to store, as it can be folded away and put away when not in use. The Bythai BT04 Frame System Scaffolding is the perfect solution for any construction project or structural system.

Customization:

Frame System Scaffolding – Customized Bythai BT04
This frame system scaffolding is designed to provide a safe, secure, and lightweight scaffolding solution. With a high load capacity, the Bythai BT04 scaffolding frame system is ideal for high-rise or large-scale construction projects. The frame system has a powder coating finish and is available in both steel and painted color finishes. Safety is of the utmost importance, and this frame system has been tested to ensure high levels of safety and reliability.

Support and Services:

Technical Support and Service for Frame System Scaffolding

We provide technical support and service for our Frame System Scaffolding product. Our expert team of technicians is available to answer your questions about the product's installation, operation, and troubleshooting.

We also offer a variety of services to ensure that your Frame System Scaffolding is functioning properly, including:

Installation and setup assistance

On-site maintenance and repair

Technical support and advice

Software and firmware updates

If you have any questions or need any assistance with your Frame System Scaffolding, please contact us and we will be happy to help.
