

## EN39 Standard And 245N/Mm2 Oil And Gas Tubes Galvanised Steel Scaffold Tube Available

### Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

#### Product Specification

- Thickness: 3.2mm
- Yield Strength: 245N/mm2
- Surface Treatment: Galvanised
- Diameter: 48.3mm
- Material: Galvanised Steel
- Elongation: >20%
- Weight: 6.4kg/m
- Tensile Strength: 420N/mm2
- Highlight: **Galvanised Steel Scaffold Tube,  
EN39 Galvanised Steel Scaffold Tube,  
Galvanised Scaffolding Steel Tube**

## Product Description

### Product Description:

Galvanised Scaffold Tube is a versatile scaffolding product manufactured out of galvanised steel. This Galvanised Steel Scaffold Piping offers excellent corrosion resistance and is available in a diameter of 48.3mm. The surface treatment of the Galvanised Scaffolding Tube is galvanised which further increases its corrosion resistance properties. The Galvanised Steel Scaffold Piping is ideal for a wide range of uses such as construction, engineering, and other industrial applications. The Galvanised Scaffold Tube is strong and durable, making it an ideal choice for scaffolding projects.

### Features:

Product Name: Galvanised Scaffold Tube

Corrosion Resistance: Excellent

Name: Galvanised Scaffold Tube

Weight: 6.4kg/m

Material: Galvanised Steel

Standard: EN39

Galvanised Metal Scaffold Tube

Galvanised Scaffold Piping

Galvanised Steel Scaffold Tube

### Technical Parameters:

Parameter	Description
Material	Galvanised Steel
Surface Treatment	Galvanised
Bending Radius	>2.5D
Application	Scaffolding
Tensile Strength	420N/mm2
Elongation	>20%
Thickness	3.2mm
Name	Galvanised Scaffold Tube
Corrosion Resistance	Excellent
Yield Strength	245N/mm2

### Applications:

Bythai Scaffolding's BT01 Galvanised Metal Scaffold Tube is a SGS certified product with excellent corrosion resistance and tensile strength of 420N/mm2. This galvanised metal scaffolding tube is 48.3mm in diameter and 3.2mm in thickness. It is reasonably priced at between \$5 and \$18 per piece, and is available in bundles for delivery within 7-15 days of purchase. Bythai Scaffolding also offers a supply ability of up to 1000tons per month, with payment terms of either TT or LC.

The BT01 Galvanised Metal Scaffold Tube is perfect for a wide range of applications, from construction and engineering to industrial and commercial use. Its corrosion resistance makes it ideal for outdoor use in even the harshest conditions, while its tensile strength ensures structural integrity and stability. Despite its high quality and durability, the BT01 Galvanised Metal Scaffolding Tube remains one of the most cost-effective solutions on the market.

### Support and Services:

Technical Support and Service for Galvanised Scaffold Tube

We provide technical support and service for all Galvanised Scaffold Tube products. Our team is dedicated to helping you find the best solution for your project. We are available to answer any questions you may have, and we also offer on-site installation and training.

We also provide maintenance and repair services for our Galvanised Scaffold Tube products. Our experienced technicians can inspect and repair any problem you may have, ensuring that your product is operating as efficiently and safely as possible.

We are committed to providing the highest quality service to our customers. If you have any questions or concerns, please do not hesitate to contact us.

### Packing and Shipping:

Packaging and Shipping of Galvanised Scaffold Tube

The Galvanised Scaffold Tube is packed in bundles of 10 or 20 tubes depending on the size. The bundles are then shrink-wrapped and strapped with steel bands for added security. The tubes can then be loaded onto pallets for shipping by sea, road, or rail. The tubes are covered with protective plastic when being shipped by road or rail to ensure that they reach their destination in perfect condition.

We also offer custom packaging services such as individual tube wrapping or special packaging solutions for large orders.
