Product Description

Product Description:

Scaffolding Coupler - High-strength Scaffold Connector

Our Scaffolding Coupler is a high-strength scaffold connector designed to provide reliable and secure connections between scaffolding tubes. It is an essential tool for any construction project that involves scaffolding structures.

Key Features

High Strength: Made with high-quality steel material, our Scaffolding Coupler offers exceptional strength and durability to withstand heavy loads and harsh weather conditions.

British-style Scaffold Connectors: Our couplers are designed with a British-style connection system, making them compatible with most scaffold tubes and clamps in the market.

Universal Scaffold Clamping Tools: Our couplers are equipped with universal clamping tools that can be easily tightened with a hammer or wrench, providing a quick and secure connection between scaffold tubes.

Steel Structure Scaffold Connectors: The use of steel material in our couplers ensures a strong and stable connection between scaffold tubes, providing a safe working platform for workers.

Product Details

Name: Scaffolding Coupler

Material: Steel

Package: Container

MOQ: 1000 pieces

Advantages

Easy to Use: Our Scaffolding Coupler can be easily installed and removed without the need for specialized tools, saving time and effort during construction.

Cost-effective: With a high MOQ of 1000 pieces, our Scaffolding Coupler offers a cost-effective solution for large-scale construction projects.

Reliable and Secure: Our couplers are designed and tested to meet safety standards, ensuring a reliable and secure connection between scaffold tubes.

Invest in our Scaffolding Coupler for your construction project and experience the convenience, strength, and safety it provides. Contact us today to place your order and get a quote.

Features:

Product Name: Scaffolding Coupler

Package: Container

Application: Construction

Material: Steel

Surface Treatment: Galvanized

Key Features:

Universal Scaffold Clamping Tools

Manual Scaffold Connection Tools

High-quality Steel Material

Galvanized Surface for Durability

Easy to Install and Remove

Technical Parameters:

Product Name	Scaffolding Coupler
Surface Treatment	Galvanized
Color	Silver
Application	Construction
Package	Container
Standard	EN74-1
Feature	High Strength
Material	Steel
MOQ	1000
Key Words	BS1139 Standard Couplings, High-Quality British Couplers, British Scaffold Fixtures

Applications:

Scaffolding Coupler - BM201

Brand Name: scaffolding coupler

Model Number: BM201
Place of Origin: china tianjin
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 15-25
Payment Terms: TT/TC
Standard: EN74-1
MOQ: 1000
Introduction

Scaffolding Coupler is an essential tool in the construction industry, used for connecting scaffolding tubes and structures. It is designed and manufactured by the reputable brand, scaffolding coupler, in China, Tianjin. With its high-quality materials, durable construction, and SGS certification, it has become a popular choice among construction workers and companies around the world.

Application

Scaffolding Coupler is widely used in the construction industry, specifically in the installation and maintenance of scaffolding systems. It is used to connect scaffolding tubes and structures, providing stability and support for workers to carry out their tasks safely and efficiently. It is also commonly used in the repair and maintenance of buildings, bridges, and other structures.

Features

BS EN 74 Scaffold Accessories: The scaffolding coupler meets the standards set by BS EN 74, ensuring its quality and reliability.

Scaffold and Structure Connectors: The coupler is designed to connect scaffolding tubes and structures securely, providing stability and support for workers.

Manual Scaffold Connection Tools: This coupler is a manual tool that does not require any special equipment or machinery for installation, making it convenient and easy to use.

Scaffolding System: It is compatible with various types of scaffolding systems, making it a versatile and essential tool for construction projects.

Construction Industry: Scaffolding Coupler is specifically designed for the construction industry, meeting the needs and demands of construction workers and companies.

Safety: The coupler is designed to provide a secure and stable connection, ensuring the safety of workers and preventing accidents at the construction site.

High Quality: Made from high-quality steel, the coupler is strong, durable, and able to withstand heavy loads and harsh working conditions.

Durable: The galvanized surface treatment of the coupler makes it resistant to corrosion and rust, ensuring its longevity and durability.

Why Choose Scaffolding Coupler?

High-quality materials and construction

SGS certification for reliability and safety

Compatible with various scaffolding systems

Easy to use with no special equipment required

Provides stability and support for workers

Resistant to corrosion and rust

Meets industry standards for quality and safety

Conclusion

Scaffolding Coupler - BM201 is a versatile, reliable, and essential tool for the construction industry. Its high-quality materials, durability, and safety features make it a popular choice among construction workers and companies. With its compatibility with various scaffolding systems, it is a must-have for any construction project. Trust Scaffolding Coupler to provide the stability and support needed for a safe and efficient construction site.

Packing and Shipping:

Packaging and Shipping for Scaffolding Coupler

Packaging

Our Scaffolding Couplers are securely packaged to ensure safe delivery to our customers. Each coupler is individually wrapped in plastic to prevent any scratches or damage during transportation. They are then packed in strong, durable cardboard boxes, with additional padding and cushioning materials to provide extra protection. The boxes are clearly labeled with the product name, quantity, and any other necessary information.

Shipping

We offer various shipping options to meet the diverse needs of our customers. Our standard shipping method is by sea, which is the most cost-effective option for large orders. For urgent orders, we also offer air freight shipping, which ensures faster delivery but at a higher cost. We work with reliable and trusted shipping partners to ensure timely and safe delivery of our products.

For international orders, we handle all necessary customs documentation and procedures to ensure smooth delivery to our customers.

We also offer tracking services so our customers can monitor the progress of their shipment.

Our team takes great care in packaging and shipping our Scaffolding Couplers to ensure they arrive in perfect condition and on-time. We are committed to providing the best customer experience and strive to exceed our customers' expectations in every aspect.
