Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM205
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Size: Customized
- Load Capacity: High
- Arrival Time: 10-15
- Material: Q235
- Color: Steel/Spray Plastic
- Shipping Origin: China

Product Description

Product Description:

Product Overview: Frame System Scaffolding

Frame System Scaffolding is a versatile scaffold system that is designed to provide a safe and efficient solution for construction work. It is made from high-quality Q235 steel and can be spray plastic coated for added protection against rust and corrosion. The arrival time for this product is between 10 to 15 days and the size can be customized according to the specific needs of the project.

Key Features:

Frame Upright: The main component of the Frame System Scaffolding, the frame upright provides vertical support and stability to the entire structure. It is made from durable Q235 steel and is available in various sizes to suit different construction needs.

Scaffold Frame: The scaffold frames are used to create the horizontal platform for workers to stand on. These frames are lightweight yet strong, making them easy to transport and assemble on site. They come in different sizes and can be easily stacked for storage.

Cross Brace: The cross brace is an essential part of the scaffolding system as it provides additional support and stability to the structure. It is made from high-quality Q235 steel and is available in different lengths to fit various frame sizes.

Adjustable Base Plate: The adjustable base plate is used to level the scaffolding on uneven surfaces. It can be easily adjusted to provide a stable and secure base, ensuring the safety of workers.

Stability: The Frame System Scaffolding is designed to provide maximum stability, even on uneven ground. Its sturdy construction and adjustable base plates ensure that the structure remains secure and safe for workers to use.

Durability: Made from high-quality Q235 steel, the Frame System Scaffolding is built to withstand heavy loads and harsh weather conditions. It is durable and can be used for multiple construction projects, making it a cost-effective solution.

Easy Assembly: The Frame System Scaffolding is easy to assemble and does not require any special tools or equipment. The components can be easily interlocked and secured, allowing for quick and efficient setup on site.

Product Specifications:

Arrival Time: 10-15 days

Size: Customized

Color: Steel/Spray Plastic

Load Capacity: High

Material: Q235 steel

Conclusion:

The Frame System Scaffolding is a reliable and efficient solution for construction work. Its sturdy construction, stability, and durability make it a popular choice among contractors and workers. With customizable sizes and a high load capacity, it can be used for a variety of construction projects. Its easy assembly also makes it a convenient choice for on-site use. Choose Frame System Scaffolding for a safe and efficient construction process.

Technical Parameters:

| Technical Parameter | Value |
|--------------------------|--|
| Load Capacity | High |
| Size | Customized |
| Shipping origin | China |
| Arrival time | 10-15 days |
| Color | Steel/Spray Plastic |
| Material | Q235 |
| Frame Upright | Q235 Steel |
| Frame System Structuring | Modular and easily assembled |
| Frame Upright Length | Customized according to specific project needs |

Applications:

Bythai Frame System Scaffolding - Your Reliable Partner for Construction

Brand Name: Bythai

Model Number: BM205

Place of Origin: China

Certification: SGS

Price: 4.5-8.5 per piece

Delivery Time: 10-15 days

Payment Terms: TT/TC

Load Capacity: High

Size: Customized

Color: Steel/Spray Plastic

Arrival time: 10-15 days

Shipping origin: China

Product Introduction

Bythai Frame System Scaffolding is a highly efficient and versatile scaffolding solution for various construction projects. It is designed with the highest quality standards to provide safe and reliable support for building structures.

Application and Scenarios

Bythai Frame System Scaffolding is widely used in construction sites, buildings, and maintenance projects. It is suitable for both indoor and outdoor use, making it a popular choice among construction companies and contractors.

Here are some common scenarios where Bythai Frame System Scaffolding can be used:

Construction Site: The scaffold portal frame system can be used for various construction tasks such as concrete pouring, brickwork, and painting. It provides a stable and secure platform for workers to perform their tasks with ease and efficiency.

Building Maintenance: Bythai Frame System Scaffolding can be used for regular maintenance and repair work on buildings. Its high load capacity and customizable size make it suitable for different building structures.

Structuring: This scaffolding system is also useful for structural work during the construction of new buildings or renovation projects. It can provide support for walls, floors, and roofs, allowing workers to work at different heights safely.

Product Features

High Load Capacity: Bythai Frame System Scaffolding is designed to withstand heavy loads, making it suitable for various construction tasks.

Customizable Size: The size of the scaffolding can be adjusted according to the specific needs of the project, providing flexibility and convenience for construction workers.

Steel/Spray Plastic Color Options: The scaffolding is available in steel or spray plastic colors, providing options for different project requirements.

Strong and Durable: Made with high-quality materials, Bythai Frame System Scaffolding is strong and durable, ensuring the safety of workers and the stability of the structure.

Easy to Assemble and Transport: The scaffolding is designed for easy assembly and disassembly, making it convenient to transport to different construction sites.

Why Choose Bythai Frame System Scaffolding?

Quality Assurance: Bythai Frame System Scaffolding is certified by SGS, ensuring the highest quality and safety standards.

Competitive Price: With a price range of 4.5-8.5 per piece, Bythai Frame System Scaffolding offers a cost-effective solution for construction companies and contractors.

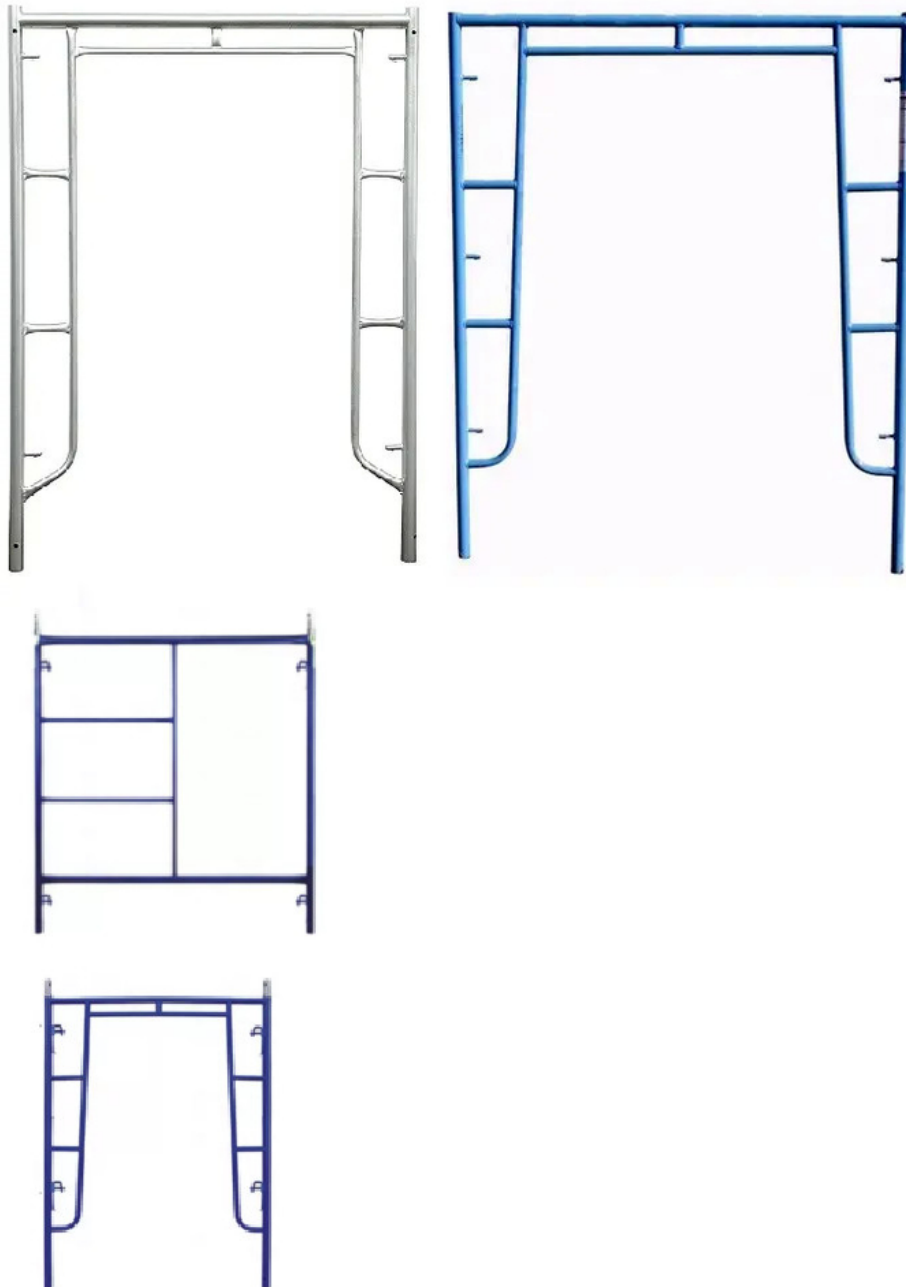

Efficient Delivery: With a delivery time of 10-15 days, Bythai strives to provide timely and efficient service to its customers.

Reliable Payment Terms: Bythai offers flexible payment options such as TT/TC, making it easier for customers to do business with them.

Conclusion

Bythai Frame System Scaffolding is a reliable and efficient solution for all your construction needs. With its high load capacity, customizable size, and strong and durable structure, it is suitable for various construction tasks. Choose Bythai and experience the difference in your construction projects.

Packing and Shipping:

Package and Shipping for Frame System Scaffolding

Our Frame System Scaffolding is carefully packaged and shipped to ensure safe delivery to our customers. Here is an overview of our packaging and shipping process:

Packaging

Each component of our Frame System Scaffolding is individually wrapped and packed using high-quality materials to prevent any damage during transportation. The frames are wrapped in protective foam and secured with plastic wrap to prevent any scratches or dents. The smaller components, such as bolts and braces, are placed in sturdy boxes to avoid any loss or damage during shipping.

Shipping

We offer various shipping options to our customers, including ground, air, and sea transportation. Our team carefully selects the most efficient and cost-effective shipping method based on the customer's location and delivery timeframe.

Once the package is ready for shipping, we ensure that it is properly labeled with the customer's information and shipping address. This helps to avoid any delays or errors during delivery.

We also provide tracking information for our customers so that they can monitor the progress of their order and receive timely updates on the expected delivery date.

International Shipping

For our international customers, we follow all necessary procedures and regulations for customs clearance to ensure smooth delivery. We also provide all required documentation, such as commercial invoices and packing lists, to expedite the customs clearance process. Our goal is to ensure that our Frame System Scaffolding reaches our customers in perfect condition and on time. We take great care in packaging and shipping our products to guarantee customer satisfaction.
