Product Description

Product Description:

Frame System Scaffolding - Product Overview

The Frame System Scaffolding is a versatile and durable scaffolding system designed for heavy duty construction projects. Made from high quality Q235 material, this scaffolding is built to withstand heavy loads and provide a safe and stable working platform for workers. The h scaffold system features frame uprights that can be easily assembled and disassembled, making it a convenient and efficient choice for construction sites. The h frame design offers strong support and stability, ensuring the safety of workers at all times.
This product is shipped from China and has an estimated arrival time of 10-15 days. This makes it a great choice for time-sensitive projects that require a reliable and efficient scaffolding system. Additionally, the Frame System Scaffolding is available in both steel and spray plastic color options, providing customers with a choice that suits their preferences and needs.
With a high load capacity, this scaffolding system is suitable for various construction tasks such as painting, plastering, and building maintenance. Its sturdy construction and easy assembly make it a popular choice among contractors and workers alike. Plus, the Q235 material used in the making of this scaffolding ensures its longevity and durability, making it a cost-effective investment for any construction project.
In conclusion, the Frame System Scaffolding is a top-of-the-line product that offers high load capacity, convenience, and durability. Its h scaffold system and h frame design make it a reliable and safe choice for any construction project. With a shipping origin in China and an estimated arrival time of 10-15 days, this product is a popular choice among contractors and construction companies looking for a high-quality and efficient scaffolding system. Choose the Frame System Scaffolding for your next construction project and experience the convenience and reliability it offers.

Technical Parameters:

Shipping Origin: China

Load Capacity: High

Material: Q235

Size: Customized

Arrival Time: 10-15 days

Bythai's Frame System Scaffolding, model BM205, is a highly versatile and durable scaffolding solution that is suitable for a wide range of construction projects. Made from high quality Q235 material, this scaffold frame is designed to provide superior support and stability, making it ideal for use in both commercial and residential construction projects.

One of the major advantages of Bythai's Frame System Scaffolding is its mobility. This scaffold frame can be easily moved and set up in different locations, making it perfect for projects that require frequent changes in the work site. Its portal frame shoring system also allows for easy assembly and disassembly, saving time and labor costs.

With its high load capacity, this scaffolding frame can support heavy loads, making it suitable for use in projects that involve heavy construction materials. Its customizable size also makes it a practical choice for projects of all sizes, ensuring that it can accommodate different construction needs.

In addition to its practical features, Bythai's Frame System Scaffolding also comes with SGS certification, ensuring that it meets international quality and safety standards. Its affordable price range of $4.5-8.5 per unit, makes it a cost-effective option for contractors and construction companies.

The packaging of this scaffolding frame is also designed for convenience, with bundles that are easy to transport and store. With a

delivery time of 10-15 days, customers can expect a quick turnaround for their orders. Payment terms of TT/TC are also available for added convenience.
Overall, Bythai's Frame System Scaffolding is a top choice for construction projects that require a reliable, versatile, and cost-effective scaffolding solution. With its high-quality materials, easy assembly, and mobility, it is a valuable asset for any construction team.
