

## 48.3mm Galvanised Scaffold Tube With 245N/Mm2 Yield Strength For Scaffolding Needs

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

### Product Specification

- Name: Galvanised Scaffold Tube
- Yield Strength: 245N/mm2
- Tensile Strength: 420N/mm2
- Diameter: 48.3mm
- Weight: 6.4kg/m
- Material: Galvanised Steel
- Standard: EN39
- Surface Treatment: Galvanised
- Highlight: **245 N/Mm2 Galvanized Scaffolding Tube, 48.3mm Galvanised Scaffold Pipe, Galvanised Alloy Scaffold Tube**

## 48.3mm Galvanised Scaffold Tube With 245N/Mm2 Yield Strength For Scaffolding Needs

### Product Description:

Galvanised Scaffold Tube - The Ultimate Choice for Your Construction Needs

The Galvanised Scaffold Tube, also known as pipe scaffold tube, is a versatile and highly durable product that is widely used in the construction industry. Made from high-quality galvanized steel, this product is designed to provide exceptional strength and reliability for all your scaffolding needs. It is the perfect choice for any construction project, big or small, and is manufactured to meet the highest industry standards.

Product Overview

Our Galvanised Scaffold Tube is a seamless pipe that is made from galvanized steel and adheres to the EN39 standard. With a tensile strength of 420N/mm<sup>2</sup> and a weight of 6.4kg/m, this product is lightweight yet incredibly strong, making it ideal for a range of construction applications. Its thickness of 3.2mm ensures maximum stability and safety, making it a reliable choice for any scaffolding structure.

Key Features

When it comes to scaffolding, strength and durability are of utmost importance. Our Galvanised Scaffold Tube offers just that, along with a range of other key features that make it the ultimate choice for your construction needs.

#### High Strength

The Galvanised Scaffold Tube boasts a tensile strength of 420N/mm<sup>2</sup>, making it one of the strongest scaffolding products on the market. This strength ensures that your scaffolding structure can withstand heavy loads and provide a safe working platform for your construction workers.

#### Lightweight

Weighing only 6.4kg/m, this product is lightweight and easy to handle, making it suitable for a range of construction projects. Its light weight also means that it can be transported and assembled quickly and efficiently, saving you time and costs on your construction project.

#### Durable

Made from galvanized steel, our Galvanised Scaffold Tube is highly durable and can withstand harsh weather conditions and heavy use. This ensures that it will last for years to come, making it a cost-effective choice for your scaffolding needs.

#### Corrosion Resistant

The galvanized coating on our scaffold tube makes it highly resistant to corrosion, even in the most challenging environments. This means that your scaffolding structure will maintain its strength and durability, providing a safe working platform for your construction workers.

#### Easy to Assemble

With its seamless design and lightweight structure, our Galvanised Scaffold Tube is incredibly easy to assemble. This saves you time and effort on your construction project, allowing you to complete your project efficiently and on time.

#### Versatile

The Galvanised Scaffold Tube is a versatile product that can be used for a range of construction applications. Whether you need it for building, maintenance, or repair work, this product is suitable for all types of scaffolding structures.

Conclusion

The Galvanised Scaffold Tube is the ultimate choice for all your scaffolding needs. With its high strength, lightweight design, and durability, it is the perfect product for any construction project. Its corrosion resistance, easy assembly, and versatility make it a cost-effective and reliable choice for all your scaffolding needs. Choose the Galvanised Scaffold Tube for a safe and efficient construction process.

#### Technical Parameters:

Product Name	Galvanised Scaffold Tube
Surface Treatment	Galvanised
Standard	EN39

Material	Galvanised Steel
Application	Scaffolding
Yield Strength	245N/mm2
Tensile Strength	420N/mm2
Diameter	48.3mm
Thickness	3.2mm
Weight	6.4kg/m
Product Name	Galvanized Scaffold Tube 48
Scaffold Tube Specification	EN39 / Seamless Pipe
Material	Galvanized Steel
Application	Scaffolding
Yield Strength	245N/mm2
Tensile Strength	420N/mm2
Diameter	48.3mm
Thickness	3.2mm
Surface Treatment	Galvanised
Weight	6.4kg/m

### Applications:

Galvanised Scaffold Tube - Perfect for Your Construction Needs

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Yield Strength: 245N/mm2

Standard: EN39

Material: Galvanised Steel

Thickness: 3.2mm

Surface Treatment: Galvanised

Bythai Scaffolding's Galvanised Scaffold Tube is the perfect choice for any construction project. Made from high-quality galvanised steel, our scaffolding tubes are designed to provide strong and reliable support for any building or structure.

Application and Scenarios

Our scaffolding tubes are widely used in various construction sites, including:

Building construction

Bridge construction

Tunnel construction

Highway construction

Industrial construction

With a diameter of 48.3mm and a thickness of 3.2mm, our galvanised scaffold tubes are suitable for all types of scaffolding systems.

They are especially ideal for pipe scaffold structures, providing a safe and sturdy platform for workers to perform their tasks.

Features and Benefits

Our Galvanised Scaffold Tubes offer a wide range of features and benefits, making them the top choice for construction professionals:

**Safety:** Our scaffolding tubes are made from high-quality galvanised steel, ensuring their strength and durability. They provide a secure platform for workers to perform their tasks without any risk of accidents.

**Corrosion Resistance:** The galvanised surface of our tubes makes them highly resistant to corrosion, even in harsh weather conditions. This makes them suitable for both indoor and outdoor use.

**Easy Installation:** The standard EN39 specification of our scaffolding tubes makes them compatible with various scaffolding systems, making the installation process quick and simple.

**Durability:** Our tubes have a yield strength of 245N/mm2, making them strong and durable enough to withstand heavy loads and rough handling.

Why Choose Galvanised Scaffold Tube from Bythai Scaffolding?

Bythai Scaffolding is a trusted and reputable brand in the construction industry. Our Galvanised Scaffold Tubes are manufactured in compliance with international standards and have gone through rigorous quality control processes to ensure their reliability and durability. With a monthly supply ability of 1000 tons, we can meet your bulk orders and provide timely delivery. Our competitive pricing and flexible payment terms make us the preferred choice of many construction companies.

Invest in our Galvanised Scaffold Tubes and experience the difference in quality and performance. Contact us today to request a quote or for any further inquiries.
