Product Description

Sturdy And Durable Scaffolding Ladders Finish And 50cm Step Width

Product Description:

Scaffolding Ladders

Our Scaffolding Ladders are the perfect solution for your construction needs. With a step height of 30cm and step width of 50cm, it allows for comfortable climbing and easy movement on the ladder. Its size of 3m makes it suitable for various construction projects.
This ladder is designed to provide a safe and sturdy platform for workers to climb on. It is a durable and reliable choice for any construction site.
One of the key features of our Scaffolding Ladders is its unique design. Unlike traditional ladders, our ladder does not have a hook at the top. This eliminates the risk of the ladder slipping or falling, ensuring the safety of workers.
The surface treatment of our Scaffolding Ladders is HDG (hot-dip galvanized), which provides excellent protection against corrosion and rust. This makes it suitable for both indoor and outdoor use, even in harsh weather conditions.
At our company, we understand the importance of quality and safety. That's why our Scaffolding Ladders come with a 2-year warranty, giving you peace of mind and ensuring the longevity of the product.
With our Scaffolding Climbing Platforms, workers can easily access different levels of a construction site, making it a versatile and essential tool for any construction project. Its sturdy and stable structure provides a reliable platform for workers to work on, increasing productivity and efficiency.
Our Scaffolding Ladders are the perfect choice for contractors, construction companies, and DIY enthusiasts. Its lightweight design and easy assembly make it convenient to transport and use in different locations.
Invest in our Scaffolding Ladders and provide your workers with a safe and efficient way to access different levels of a construction site. Contact us today to get a quote and take a step towards safer and more efficient construction practices.

Product Introduction

Scaffolding Ladders, also known as Scaffolding Props or Load-bearing Ladders, are an essential piece of construction equipment used for climbing scaffolding structures. They are designed to provide a safe and stable platform for workers to access different levels of a building or construction site. The bythai BM224 is a high-quality and reliable Scaffolding Ladder that is perfect for any construction project.
Application and Usage

The bythai BM224 Scaffolding Ladders are suitable for a variety of applications, including but not limited to:

Building and construction sites

Renovation and maintenance projects

Industrial and commercial projects

Bridge and highway construction

These ladders are used by construction workers, contractors, and other professionals who need to access elevated areas safely and efficiently. The load capacity of 150kg makes it suitable for carrying heavy tools and equipment, making it an ideal choice for construction sites where workers need to transport materials to different levels.
Safety and Durability

The bythai BM224 Scaffolding Ladders are designed with safety and durability in mind. The step height of 30cm provides a comfortable and stable platform for workers to climb on. The surface treatment of HDG (hot-dipped galvanized) ensures that the ladder is resistant to rust, corrosion, and other environmental factors, making it suitable for use in different weather conditions.
Moreover, this product comes with a 2-year warranty, giving customers peace of mind and ensuring that they receive a high-quality and long-lasting product.
Ordering and Delivery

The minimum order quantity for the bythai BM224 Scaffolding Ladders is 1000 pieces. The ladders are packaged in containers for easy transport and delivery. The estimated delivery time is 10-25 days, depending on the quantity ordered and the delivery location.
Conclusion

The bythai BM224 Scaffolding Ladders are a must-have for any construction project. With its sturdy and safe design, high load capacity, and long warranty period, it is the perfect choice for professionals in the construction industry. Place your order today and experience the convenience and safety of using our Scaffolding Climbing Ladders. Trust bythai for all your construction equipment and safety tool needs.

Packing and Shipping:

Scaffolding Ladders - Packaging and Shipping

Thank you for choosing our Scaffolding Ladders! We take great pride in providing high-quality and durable products for all your construction needs.
In order to ensure the safe delivery of your purchased Scaffolding Ladders, we have carefully designed our packaging and shipping process. Please see the details below:
Packaging:

Each ladder is individually wrapped and secured with bubble wrap to prevent any damage during transportation.

All ladders are then placed in a sturdy corrugated cardboard box for further protection.

The box is sealed with strong tape to prevent it from opening during transit.

Shipping:

We offer both domestic and international shipping options for our Scaffolding Ladders.

For domestic shipping, your order will be shipped via a reliable courier service and should arrive within 3-5 business days.

For international shipping, your order will be shipped via air freight and should arrive within 7-14 business days, depending on your location.

All orders will be provided with a tracking number so you can easily track the status of your shipment.
If you have any special shipping requests, please let us know and we will do our best to accommodate them.
Thank you again for choosing Scaffolding Ladders. We hope they will serve you well in your construction projects.
