Building Construction American Type USA Standard Scaffolding Drop Forged Steel Angle Adjustable Clamp/Swivel Coupler

Our Product Introduction

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 8.5-15.8
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Standard: EN74-1
- Material: Steel
- Package: Container
- Surface Treatment: Galvanized
- MOQ: 1000
- Application: Construction
- Name: Scaffolding Coupler
- Feature: High Strength
- Highlight: **American Scaffolding Coupler**, **Building Construction Scaffolding Coupler**, **Forged Steel Angle Adjustable Clamp**

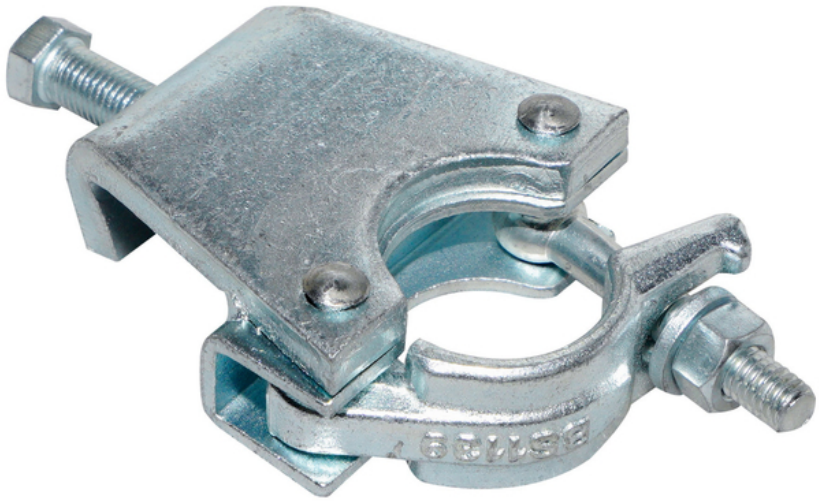
Product Description

Product Description:

The Scaffolding Coupler is a vital component in any scaffold clamping system, designed to interconnect scaffold tubes securely for the construction of scaffolding structures. Crafted with precision, this coupler embodies high strength and durability, suitable for supporting complex scaffold installations in various construction and maintenance projects. The Scaffolding Coupler ensures a solid and reliable connection between scaffold tubes, providing stability and safety for workers.
Manufactured from premium quality steel, the Scaffolding Coupler is engineered to withstand the rigors of construction environments. Steel, known for its robustness and resistance to deformation, offers the strength needed to support heavy loads and resist the stresses imparted during the use of scaffolding. The material choice ensures that the coupler is not only strong but also has a long service life, reducing the need for frequent replacements and offering better value for investment over time.
The Scaffolding Coupler adheres to the stringent BS EN 74 Scaffold Accessories standard, which dictates the specifications for the performance and design of couplers used in scaffold systems. This standard ensures that the coupler meets the necessary safety and quality requirements, providing peace of mind that the product is fit for the demanding conditions of construction sites. By meeting the EN74-1 standard, the Scaffolding Coupler guarantees compliance with European norms, making it a trustworthy choice for projects within the EU and beyond.

Technical Parameters:

Attribute	Details
Name	Scaffolding Coupler
Material	Steel
Feature	High Strength
Surface Treatment	Galvanized
Standard	EN74-1
MOQ	1000
Color	Silver
Application	Construction
Package	Container



Packing and Shipping:

Our logistics team takes great care in selecting the best shipping methods for the Scaffolding Coupler to guarantee timely and secure delivery. We partner with reliable carriers who are experienced in handling construction equipment. Tracking information is provided for each shipment, allowing customers to monitor their order's journey from our warehouse to its destination. Upon arrival, we encourage customers to inspect the package for any signs of damage during transit and to report any concerns immediately for prompt resolution.
