

Galvanised Scaffold Tube Strength and Corrosion Resistant with Yield Strength 245N/mm2

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS ISO
- Model Number: BT201
- Minimum Order Quantity: 1000
- Price: \$10-\$85
- Packaging Details: In bundles
- Delivery Time: 10-15 days
- Payment Terms: TT/TC
- Supply Ability: 1000tons per month

Product Specification

- Yield Strength: 245N/mm2
- Application: Scaffolding
- Standard: EN39
- Name: Galvanised Scaffold Tube
- Material: Galvanised Steel
- Surface Treatment: Galvanised
- Diameter: 48.3mm
- Thickness: 3.2mm
- Highlight: **Corrosion Resistant Galvanised Scaffold Tube, 245N/mm2 Galvanised Scaffold Tube, Strength Galvanised Scaffold Tube**

Product Description

Product Description:

The Galvanised Scaffold Tube is designed to withstand heavy loads while maintaining its structural integrity. It has a tensile strength of 420N/mm² and a yield strength of 245N/mm², making it one of the strongest scaffold tubes on the market. This means that you can be confident that it will be able to support the weight of your workers and equipment, ensuring that they can work safely and efficiently. At 6.4kg/m, the Galvanised Scaffold Tube is lightweight and easy to handle, making it ideal for use in a variety of applications. It is easy to install and dismantle, which means that you can set up and take down your scaffolding quickly and efficiently, reducing the amount of time that your workers spend on the job.

The Galvanised Scaffold Tube is ideal for use in a wide range of applications, including building construction, bridge construction, and industrial maintenance. It is also suitable for use in outdoor environments, as it is resistant to corrosion and weathering. This means that it will last for many years, even in harsh outdoor environments.

In conclusion, if you are looking for a reliable and durable scaffold tube for your construction or industrial needs, the Galvanised Scaffold Tube is an excellent choice. With its high tensile strength, lightweight design, and resistance to corrosion, it offers excellent performance and durability. Whether you are working on a small renovation project or a large-scale construction site, the Galvanised Scaffold Tube is the perfect solution for all your scaffolding needs.

Features:

Product Name: Galvanised Scaffold Tube

Weight: 6.4kg/m

Surface Treatment: Galvanised

Yield Strength: 245N/mm²

Material: Galvanised Steel

Technical Parameters:

| | |
|--------------------|----------------------------------|
| Application: | pipe scaffold tube |
| Name: | galvanized scaffolding pipe tube |
| Standard: | EN39 |
| Yield Strength: | 245N/mm ² |
| Tensile Strength: | 420N/mm ² |
| Material: | Galvanised Steel |
| Diameter: | 48.3mm |
| Surface Treatment: | Galvanised |
| Thickness: | 3.2mm |
| Weight: | 6.4kg/m |
